To: British Petroleum Florida Gulf Response

Subject: Oil Spill Cleanup Efforts

We see that BP's efforts to shutoff the well have finally been successful using a variety of my previous inventions. Although you have not responded to our offer of involvement in the rapid shutoff of the oil well, at least the well is finally shut off. Unfortunately we cannot go back at this point and undo the large volume of oil that has leaked into the Gulf of Mexico. However, you can reduce cleanup expenses from this point forward by involving us at this time in the creation of improved oil spill cleanup equipment. We would again be willing to create this equipment for 15% of the reduced cost of your cleanup effort due the improved efficiency of the new equipment. Remember that cleaning this spill up at sea is much cheaper than if it reaches tourist beaches with the impact on tourism added in. Please get back to us at your earliest convenience if you're interested in seeing these costs reduced.

Sincerely,

Michael R. Thomas
